500+	485	2,000	1–2d → 0
B2B customers supported across Brazil	support channels monitored with AI	tickets per month managed at peak	onboarding kickoff time after automation

PROFESSIONAL SUMMARY

Customer Success Analyst with **3 years in B2B EdTech SaaS**, covering the full customer lifecycle: implementation, onboarding, Tier 1/Tier 2 support, retention and expansion for a portfolio of 500+ schools across Brazil, including leading networks such as Avenues, Colégio Santa Cruz, Pentágono, Maple Bear and the Adventist school network.

What sets me apart is **combining customer relationships with AI-powered automation and data**: I built the dashboard that monitors 485 support channels with automatic urgency classification and automated onboarding end to end, from channel creation to delivery of implementation steps, keeping operations under control in peak months of up to 2,000 tickets.

Degree in Systems Analysis and Development, postgraduate specialization in Data Analytics, currently pursuing a Bachelor's in Software Engineering.

SKILLS

Customer Success	Implementation and onboarding · B2B account management · retention and churn prevention · upsell and expansion · CSAT and product adoption · SLA management and Tier 1/Tier 2 support · crisis management · customer enablement and training
Data & AI automation	Support metrics dashboards · SQL (PostgreSQL) · Python · n8n and webhooks · API integrations (Evolution API, LLMs) · advanced Google Sheets and Excel · Claude Code and Gemini
Technical edge	QA and functional testing in staging · web development (Next.js, React, Supabase) · hardware support and remote access · AI content creation (HeyGen, Google Flow)
Tools	Movidesk · Jira · ClickUp · Google Workspace · WaSeller · TeamViewer, AnyDesk and RustDesk

EXPERIENCE

Nutrebem — SaaS for school cafeteria management

OCT 2023 – PRESENT

Customer Success Analyst

DEC 2025 – PRESENT

- Tier 1/Tier 2 point of contact for **500+ B2B customers**; lead projects for the support team (up to 5 people), handling workload distribution, daily stand-ups and escalations.
- Manage seasonal peaks of **up to 2,000 tickets per month** (700–950 on average), personally handling and automating replies for 700–800 tickets in peak months across email, WhatsApp and phone.
- Built an **AI-powered support dashboard monitoring 485 customer WhatsApp groups**, classifying urgency and account profile; used by the entire team to assign tickets, track pending items and decide escalations. `Evolution API · n8n · LLM · Next.js`
- Automated onboarding for new contracts (20–40 per year), from the Movidesk ticket to channel creation and delivery of implementation steps, **cutting kickoff time from 1–2 days to same day**.
- **Reversed churn** through feature retraining and negotiations with Operations, Sales and leadership; lead early-stage upsell and expansion conversations (new locations and equipment rental).
- Analyze CSAT, adoption and retention based on B2B and B2C usage data; run SQL queries on the PostgreSQL database to validate customer data, records and configurations.
- Run full QA cycles in staging, logging and tracking issues in Jira.
- Create knowledge base content, video tutorials and an AI digital avatar to train new customers.

Customer Service & Technical Support

FEB 2024 – NOV 2025

- Designed SLAs and implementation processes, plus internal procedures for equipment troubleshooting and EFT payment rollout (card and Pix on the terminal).
- Trained new team members on Movidesk, Slack, internal systems, self-service kiosks and remote support.
- Hardware and software support: assembly, maintenance and remote updates of self-service kiosks. `TeamViewer · AnyDesk · RustDesk`
- Created automated replies for the most common customer questions, speeding up support.

IT Systems Support

OCT 2023 – FEB 2024

- Provided technical support to the nutrition team, including product registration and cataloging in the system and process automation.

Independent projects — Automation, Data & Web Development

JUN 2026 – PRESENT

- **WhatsApp → AI → BI data pipeline**: capture of operational messages, orchestration, AI-based structuring and real-time KPIs. `Evolution API · n8n · Gemini API · Looker Studio`
- **Websites and management dashboards** for small service businesses (custom furniture and events): guided quote capture and replacement of spreadsheets with dashboards for client records, per-service status, notes and scheduling. `Next.js · React · Supabase · Vercel`
- Project portfolio: **portfolio-arthur-plum.vercel.app**
